

Strategic Aims 2021 - 2024+

Increase impact and quality of what we do, everywhere

Priorities and Associations should significantly increase their ability to deliver the mission of St John.

Empower oversight and understanding of the Order's global status

TEC/CG and SJI should be able to make evidenced based assessments of Establishments' health and behaviour in order to de-risk and inform the future.

Represent the Order as an international order of global significance

All Establishments should be able to present the global picture of St John and access resources that help to demonstrate our expertise and reach.

Provide the St John Family with the tools it needs to collaborate

St John needs to make it easy for operational managers to collaborate through the provision of facilitated frameworks, processes and tools.
